

PHARMACY STOCK PRICE SURVEY INSTRUCTIONS

Pharmacy Authorization Requirements

Pharmacies are not required to maintain a specific minimum stock of Similac infant formula on their shelves. It is expected that pharmacies will have stock available to meet the needs of their WIC customers. Further, a pharmacy authorized under the WIC Program must agree to order special infant formulas at the request of WIC participants or the local WIC project. Pharmacies are required to have an established procedure with a distributor or manufacturer which would enable the pharmacy to supply infant formula within a reasonable time when requested by a WIC participant or the local WIC project.

Pharmacies are authorized to accept formula drafts only.

Prices

Pharmacies must establish and report a price on the Stock Price Survey for Similac with Iron (13 oz. liquid concentrate) and Similac with Iron (14.1 oz. powder), even if these items are not in stock on the day the Stock Price Survey is completed.

Indicate the normal (not sale) prices for any additional infant formulas in stock the day the Stock Price Survey is completed, as indicated on the can or posted on the shelf near the formula, in the customer area where the infant formulas are offered for purchase.

PHARMACY STOCK PRICE SURVEY

Completion of this form is required for authorization as a WIC vendor pursuant to Chapter 149 of the Wis. Admin. Code. Failure to complete this form will result in denial of your application for vendor authorization or vendor disqualification.

INSTRUCTIONS Print clearly. Pharmacies must report a price on the Stock Price Survey for Similac with Iron (13 oz. concentrate) and Similac with Iron (14.1 oz. powder), even if items are not in stock on the day the Stock Price Survey is completed.
